

ABSTRACT

This project will be a result of our planning, schedule, programming skill and hard work. We will be able to learn a lot during this project. Also, we will be able to learn deep concepts related to these kind of projects for our future usage.

When the users visit our website, they will be welcomed by slider images on the Home Page. They will be able to navigate according to their respective requirements through the navbar which will be including various categories such as Women, Men, Kids, Accessories, etc.

Further, the Home Page will include Trending in Women's section, Trending in Men's section, Trending in Kid's section and Other Categories. Users will be able to navigate and click on these items. Users will be able to add or remove/delete an from the cart. Users can also create a wish-list of their choice.
